

Weekly Report

04/27/2015-05/03/2015

Research

This week, I process the data of 481000 persons in Wenzhou and 232000 persons in Lucheng district. My computer doesn't work well with the data of 481000 persons, which costs more than 10GB memory. Although Zhaoxin's PC has enough memory, the java program always crashes when I analyze the storyline graph. Besides, I am writing my graduation thesis. I think it will be done during the next week.

Plan for next week

- Find cases of our storyline project.
- Finish my graduation thesis.
